

1) The input given from keyboard is converted to computer understandable unit (bit) by the standard

- a) ISO
- b) ANSI
- c) ASCII
- d) EBCDIC

Answer: b

2) The execution nature of C program is

- a) Event-based
- b) Concurrent
- c) Multi-threaded
- d) Sequential

Answer: d

3) Choose the correct statements from the following

- a) (i) and (ii)
- b) (ii) and (iii)
- c) (i), (ii), and (iii)
- d) (ii), (iii), and (iv)

Answer: b

4) When we write  $X=Y$  in C, which of the following statements is valid?

- a) X and Y both have same values but different locations.
- b) X and Y both have same location and same values.
- c) X and Y have different values and same location.
- d) X and Y have different values and different locations.

Answer: a

- 5) What will be the output of the flowchart given below?

- a) 4
- b) 8
- c) 16
- d) 20

Answer: c

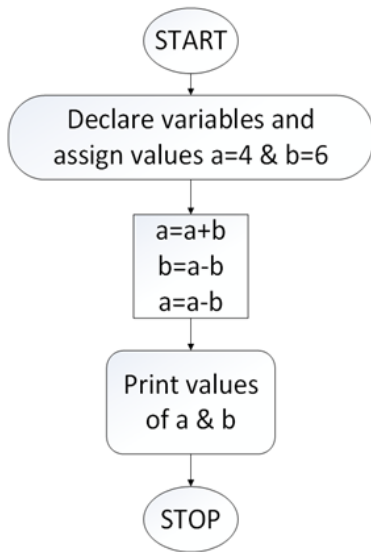

- 6) The output of the following algorithm is

- a) 21
- b) 28
- c) 30
- d) 40

Answer: b

- 7) The print values of 'a' and 'b' of the flowchart below are

- a) a=4, b=6
- b) a=6, b=4
- c) a=10, b=2
- d) a=2, b=10

Answer: b

- 8) The program which translates high level program into its equivalent machine language program is called
- a) a translator
  - b) a language processor
  - c) a converter
  - d) None of the above

Answer: a

- 9) An interpreter reads the source code of a program
- a) one line at a time
  - b) two lines at a time
  - c) complete program in one stroke
  - d) None of these

Answer: a

- 10) The C language has been developed at
- a) IBM, USA
  - b) Borland International, USA
  - c) Sun Microsystems
  - d) AT & T Bell Labs, USA

Answer: d
